

## WHY GO DIGITAL?

Construction of I-80 near Williamsburg, IA in late 1960's

The world now demands that digital media be fast and easy to use, the paper photo products of the past do not fit. **BRING IT BACK SCANNING AND ARCHIVING** is here to help anyone who has stockpiles of photos/videos and wants to convert them to a digital format.

Preservation is a leading reason for converting paper products to a digital format. Old paper photos will continue to fade over time and picture clarity will dissolve. Fire and water can damage or destroy photos. For most people there is no second photo, no backup copy. When photos are converted to a digital format, making additional copies is an easy process. Photos can also be stored on any digital media and in more than one location, to protect them from natural disasters or degrading over time.

*Don't let your memories fade away.  
Preserve them digitally forever!*

*Some things should not be forgotten.  
**BRING IT BACK** digitally!*

## BUSINESS PROFILE

Photos represent the legacy of many families and their stories. Many have priceless historical value. Photos from families and friends are waiting to be organized, stored, scanned and digitally archived. **BRING IT BACK SCANNING AND ARCHIVING (BIBSA)** can help you enjoy those old photos again and share them with future generations.

The focus of **BRING IT BACK** is to preserve and archive dated materials such as: photos, slides, film, photo negatives, paper documents, VHS, 8mm, and other video tapes into a digital medium. The intent is to resurrect interest in old and forgotten photos or materials by preserving them with digital scanning and making them new again.

*Preserve a  
lifetime of  
memories!*

## SERVICES

**BRING IT BACK SCANNING AND ARCHIVING** uses Kodak, Nikon and Epson brand scanners. These are commercial grade scanners producing great quality with a selection of DPI choices.

Business services include, but are not limited to, the scanning of:

- Photos of all size up to 8x10"
- Various size slides and film negatives
- VHS & 8mm video transfers to digital
- Reel to Reel digital conversion
- Cassette & vinyl record transfers to digital
- Photo restoration & paper document scanning are also available upon request

Document scanning is designed for family needs or small businesses who need any manner of paperwork captured into a digital format.
